The screenshot shows the Jangouts application interface. At the top, there's a red header bar with the Jangouts logo and copyright information. Below it is a dark sidebar with various icons. The main window displays a video conference interface. On the left, there's a large image of Earth from space with the text "Is your team remote or distributed? Stay productive with effortless video collaboration!" and the appear.in logo. In the center, there's a white modal box with the text "Create a room link, start talking" and a text input field containing "appear.in/ soft-loris". Below the input field is a pink button labeled "Create new room". At the bottom of the modal, there's a link "Know where to go? [Enter existing room](#)". To the right of the modal, there's a "How it works" section with a diagram showing a computer screen connected to various devices like a smartphone, a laptop, and a tablet. A red banner at the bottom of the screen says "appear.in/awesome-cat". The bottom navigation bar contains icons for various applications like Mail, Calendar, and Photoshop.
